Capt. Morgan, the commander of the Egyptian Monarch, had a crew of ninety men. She had a meagre cargo on this voyage, and owing to the failure to get a word of information of her it was feared that she had been lost in the had weather that so nearly wrecked some of the stout transatiantic liners during the last two weeks.

The Egyptian Monarch is thirteen years old. She was built at Dumbarton. Scotland. She is a four-masted, fron vessel, registering 3,916 tons. She is 370 feet long, 43 feet beam and 36 feet depth. She is fitted with compound engines.
